How BEMCC Works:Â

In the case that you are injured needing transport to a US hospital:

1.Â Call the BEMCC number (local phone, hospital phone, or with a Satellite phone)

2.Â Give them your GPS coordinates and aÂ general location description (i.e. middle of the desert/name of hospital facility/name of your boat/plane description/or any descriptions that may help them locate you (i.e. 3 red & white motorcycles at the base of the san pedro martir with a silver survival blanket layed out with the injured on top)).Â Make sure to give them any contact information you can (phone numbers/names).

3.Â You will be asked forÂ the injured'sÂ date of birth and social security number or membership number.

4.Â Give aÂ concise description of the injury & severity

5.Â BEMCC will arrangeÂ the emergency evacuation.Â If by helicopter, the coast guard, or other, they will have an ambulance waiting for the remainder of your journey to a US hospital.

6.Â They will also communicate with your emergency contacts and let them know where they can find you.
