Gift Ideas

The perfect gift for any off-road enthusiast is a Baja GPS Guidebook. Start with Volume 1 - the bible; then add more epic trails with Volume 2. If they already have the guidebooks, read below and then hover over PRODUCTS on the main menu above to see more options:

Software & CD's to accompany the guidebooks:

The Route CD's allow a guidebook owner to upload all the guide routes to the GPS in seconds. The real benefits in uploading from the CD are 1. No mistakes can be made hand punching in the waypoint to the GPS and 2. It saves an immense amount of time

Safety Equipment:

The most important section you will read on our website is a quick overview called Safety Setups & Why as well as learning about the products in the safety section. We offer several ways to travel safe on a budget and even safer if you can afford the Baja flight-for-life annual membership and the supporting equipment. Please scour this section and the top main menu link: Baja Travel Info. Being prepared saves lives.

Baja Emergency Evacuation (Flight-for-Life) Annual Membership - This is the only service available that will come for a remote rescue anywhere in Baja to save a life. It's well worth the $45 annual membership. In order to use this service, a Satellite Phone is needed for the emergency call (Rent or Purchase). This combination makes an incredible gift certificate

Satellite Phone - the Sat. phone is a one time expense that could save a life; after that, you pay for minute plans only when they take a trip. Purchasing a Sat. Phone and the Emergency Evacuation Membership gifts them the ability to call for a flight for life from anywhere in Baja! If a Sat. phone is too expensive, purchase a gift certificate in the amount of a Sat. Phone Rental ($75 p/week) based on the length of the trip. If you need assistance purchasing this kind of package as a gift, email us - we are happy to help. What an awesome gift!

Off-Road Saddlebags - get the heavy stuff off their back! These saddle bags have a custom bracket made for each model bike that secures the bags so they can off-road technical single-track, rocky terrain, or high speed trails without even knowing the bags are there! Save a back & get the packs!

GPS's & Mounts - Check out our recommendations on the newest and most updated GPS units & RAM mounts! We also sell the best and most affordable mount on the market all at a discounted price! From here, you can also purchase the upload service with a guidebook purchase so the routes are already loaded for the trip and ready to go! If they already have a GPS and you are purchasing a guidebook, you can also send in their GPS for the upload service or buy Fugawi Software & the CD's.

GPS Hardwiring - A very easy to purchase and install wiring kit that runs the GPS on the motorcycle battery so the GPS does not need continuous change of batteries. If the motorcycle does not have a battery already on the bike (email us with make/model/year and we can assist you, if needed), then you will also need the 12 or 15 volt converter. Check this out - very cool.

These are just a few suggestions amongst our huge selection of GPS, safety products, Off-Road, and other related products or make them a gift certificate so they can shop. By hovering over PRODUCTS on the main menu, a drop down window will show you an outline of everything we sell for a quick overview! Email us anytime with questions; we are happy to help!
