FEEDBACK

Hi Kacey We just got back from doing the viscous circle, Awesome trip. Just want to thank you for the great job you did. Mike Hoppman

Out of the four days of riding in Baja, the Rockman Trail was THE highlight. The trail covered such diverse terrain--the initial riverwash area with tire-sucking sand/gravel, the short but steep uphill with the step-up at the top, the long hill-climb with lava rocks galore, the miles and miles of more rocks, then the more open areas that we rode in the dark and the rain. We all had excellent lighting on the bikes, and it looked like we were a magical line of fireflies weaving along in the night. We had NO "whiners" in the group, and we all had positive spirits and a wonderful sense of camaraderie. I want to go back and do the entire trail again next year, but (alas) at least one member of our group has said that he doesn't have the desire to experience that particular trail ever again. The next time that you talk to Bill Nichols, perhaps you could tell him that I simply LOVED his trail. I truly appreciate all of his effort in creating the path over the mountains, and I also appreciate all of YOUR work in charting the GPS points and making the route available to us. A HUGE THANK YOU to you both! Kathy Roeder

What a great guide book, love the video slide show - you've got a rich history in Baja for sure... neat stuff!! The route ideas you had were very cool, the beach route from the north to ride into Scorpion bay had too much water running from the lagoon into the ocean (high tide) and was impassible. Other than that everything was absolutely perfect! You Rock!! Scott Ose

Volume 2 is more technical than Volume 1, we really dig it. The viscous circle was greatÂ and all the stuff down south rules through the tall walled canyonÂ in San Juan and the loop thru Todos Santos to Cabo and back to La Ventana up the coast - wow! Everything navigated perfectly and we had the time of our lives riding the guide for 2 weeks!! Thanks so much for all your hard work. Joeseph Potter

We started out cussing your name and ended up cheering you with your famous Negra Modelo's til we couldn't keep our eyes open. Volume 2 is sweeeet from the border to Cabo. Awesome stuff Lizard Lady! Thanks for making it an E-book too. The slideshow was great. Tim Heart

We loved the route and we plan on doing the Bill Nichols Trail next year (Catavina to El Rosario). Thank you for taking the time and effort to create the GPS Guide Volume II. I am going to encourage anyone who wants to have an adventure in Baja to purchase it. Ben
