Guide Feedback

I just wanted to pass along a quick note to tell you how very impressed I am with your business.Â Your approach and your execution are just excellent.Â Now, if only we could convince you to canvas a few other parts of the world for us!Â

Max Israel

I wanted to thank you for the "incredible",(mind boggling) effort you have put into the guide. My friend Peter and I just returned after seven long days (120+ miles a day) in baja. The guide was indispensable, accurate and responsiible for getting to, and into, spots we never would have found on our own. Thanks for all your hard work and sense of adventure. Pat Donnelly

Well, we survived our first self-guided Baja trip (in November 2008Â over Thanksgiving), with "mucho" thanks to you and your hard work you did on the guide book.Â Thank you!Â I have definitely been recommending your guide book for anybody wanting to do Baja - at least the first time (or if they want more routes).Â Your recommendations on equipment were very helpful (I did need the quick aluminum).Â We didn't get one flat among 4 riders.Â That's amazing -Â it was neat being able to confirm that we hit our waypoints.Â Route XRGN from Hwy l to Gonzaga - really cool down hills - reminded me of Oregon.Â Gonzaga Bay to Mine/Calamajue-Mine Pass Road (Route GNJJM) - You're comment "If I can do it,Â you can do it...IÂ mean I'm just a chick".Â That really hurt. Ha Ha.Â Actually we all had a learningÂ curve and after a while we figured outÂ just stay on the pegs and have a steady throttle hand andÂ we could ride over the rocks.Â Cool!Â I could go on but I won't.Â Just thanks again for all your hard work.Â It helped us have a successful trip.Â Mike EggerÂ

"Just wanted to let you know what a great book you made. I took a trip between Christmas and New Years and with your book I was able to dial all the cool rides right in. I was a Geographic Information Systems major in college and have never seen such a well-done recreation guide. Can't tell you how much I appreciate the work you did. Thanks." Kent Carter

"Hi Kacey, I enjoyed the guide very much! The route charts proved to be extremely useful, especially where Waypoint 1La8 was concerned. I watched helplessly as my faster buddies sped off to the rancho in the wrong direction. I had total confidence of where "I" was. The guide also surprised me with your route from Santo Tomas to San Vicente. I had done this route a thousand times; in fact I did it twice this year and The GPS Guided me on a little section next to the rancho through the gate over the hill that I never knew was there. It made the trip a little more interesting. Great job all the way around." Tim Sulivan

The GPS Guidebook worked like a charm taking us to some jeep roads we hadn't seen before and never would have found without the route instructions and waypoints. I'm headed back down to Baja a week from Thursday to ride a 500+ mile expanded version of the "Baja Experience" ride with Chris Steward & Nancy Emde of Trail Boss Tours..... REALLY looking forward to that multi day experience! Chris Crawford

"You've given me a steppingstone to tons of adventures in Baja to come. I wish you the greatest of happiness and success in life! Jole Stone

"Hi there, I am just back from Baja and I want to say "Thank You" for producing an amazing and awesome book. Being that this was the 1st time riding dirt bikes down there (no veteran Baja Dog to show me the way), your book really did the job - even without using a GPS. So now I am hooked; Thanks again". Robert Steffano

Hi Kacey, Remember me, I met you at the 2002 Baja 1000 at Honda pit 7? Just wanted you to know that thanks to you and your guide book our trip in April was a total success. This trip was dubbed THE SIX DAYS OF BAJA. We ended up with 26 guys and 17 4x4 rigs on a 7day trip the took us through 1250 miles of fantastic Baja terrain. Some of our stops included San Fransiscito Bay, LA Bay, Coco's corner, Gonzaga Bay, Matomi wash and Mikes. We took most of your trails which made the trip a total success. Just wanted to thank you for doing a fine job, everything was right on the mark! Jeff Cline

Thank you for your response. I did take the extra gas cans and had no problem. Playing with the GPS led us on some routes that we had only wondered about before. It is really great fun and you did a great job identifying land marks and the like. The routes were very easy. Can't wait to go again. Jim Dearheart

Hello, I am writing to tell ou that the GPS Guidebook is just plain awesome!! It's saved me several times, more than I know, and it's something that every Mexico rider should have access to. Keep up the great work!!! John Jensen

I just purchased your Baja GPS Guidebook. I can't wait to put it to use in a big way. This thing is AWESOME! Being a country boy originally from the Midwest, I'm sure I would get eaten alive in Baja without some of this information. My hat's off to ya, great job!! Tim Angus
