

GPS Software & Maps

SOFTWARE & DIGITAL TOPO MAPS: Fugawi.

Remember the Indian tribe with the mighty navigation chief? One day, the Chief got lost and was completely bewildered wandering about his forest lands. In his navigational disarray, asked his most confident warrior quietly..... "where the fugawi"..... get it? ha ha.

Fugawi moving maps software insures the navigator always knows where thier location in the world with some major technical advancements since then. Fugawi allows you to use digital maps and scan topographical maps (like more detailed maps of Baja not available digitally) and view, edit, and manipulate the guidebook routes or your own personal data. You can create routes by clicking on roads, washes or canyons you wish to explore and create routes or tracklogs for uploading to your GPS and follow. Fugawi allows you to store, transfer, edit, and manipulate our data or your own on maps. This software is used on your home computer and then interfaces the GPS. We have used Fugawi for collecting, editing, and formatting all the routes offered in the "Baja GPS Guidebook Volume 1 and Volume 2. We highly recommend Fugawi for managing all your GPS needs. Fugawi interfaces with all Magellan, Garmin, Lowrance, and most other GPS's. Click [HERE](#) to order Fugawi at a discount price.

Fugawi Topo Maps: Fugawi offers topo maps that are already scanned (digitalized) and calibrated for immediate use with Fugawi Software. They offer 2 great maps:

Baja and Mexico North: scale 1:500,000. With just the right amount of detail for off-road, this topo map contains GPS-ready tactical plotage charts with towns, roads, and topographical features for the areas of the entire peninsula of Baja California and northern mainland Mexico all on one digital map. The USGS has granted permission to digitalize this fabulous and detailed topo map. Having this map makes traveling south by GPS a technical wonder!

Map of America: scale 1:1,000,000. This is an incredible atlas of the continental USA, which will seamlessly 'fly' across the accurate landscape in 3D. View hills & valleys, lakes, rivers, cities, towns, roads, parks, powerlines, and more! Print maps at the scale of your choice and see latitude & longitude or UTM coordinates. You can measure distances and view elevations & profiles of your routes or tracklogs across the USA.

Fugawi is an extremely powerful program that is easy to learn. If you have an problems from start to finish learning this program, Fugawi offers a direct technical line for "personal assistance" with no automated bull-o-ny. A real person will get to you within 24 hours if not right away and walk you through any needed assistance at NO extra expense. That makes Fugawi a wonderfully unique and highly desirable software.
